User Manual

PHILIPS

Dear Customer,

In purchasing this machine, you have decided on a quality PHILIPS product. Your machine satisfies the full range of requirements for private use or in everyday office and business environments.

Your machine is sold with a free ink film inserted for a few test pages. You do not require a Plug'n'Print card for this ink film (= chip card with information on the ink film capacity).

In the telephone book of your machine, you can save entries with multiple numbers and collect multiple entries into groups. You can assign various ring tones to the entries.

You can assign the six speed dial buttons to frequently dialled telephone numbers. You can load these telephone numbers quickly with the speed dial buttons.

The cordless telephone is provided with its own telephone book. With the cordless telephone you can send and read SMS messages (function is not supported in all countries and networks). You can hear messages on the answering machine of the device and record new outgoing messages.

You can individually set ringer tones and notification tones, wallpaper and menu colours of the cordless telephone. Additional functions such as alarms, timer, birthday reminder or a room monitoring function are also available to you. You can register up to six cordless telephones with your device.

The built-in answering machine saves up to 30 minutes of messages. You can record internal and external voice messages (= memos). You can listen to new messages from any telephone using the remote control function. With the VIP code, callers can also reach you even while the answering machine is switched on.

You can send fax messages in various resolutions to one or more recipients or a group. You can also poll faxes and offer documents for polling.

Five fax templates, which you can use, are stored in your device. With these templates you can quickly create, for example, a short fax note or an invitation.

Select the resolution for text and photo in order to copy documents with your machine. You can also create multiple copies.

You can send SMS messages from your machine if this service is activated for your telephone line (this function is not supported in all countries and networks). Received SMS messages can be managed with the extensive functions of the SMS menu.

Activate notification by SMS to receive an SMS message, for instance on your mobile phone, when calls, fax transmissions or other messages arrive in your absence (this function is not supported in all countries and networks).

If you want, your device can print Sudoku puzzles in four different difficulty levels with solution.

We hope you enjoy your machine and its many functions!

About this User Manual

With the installation guide on the following pages, you can start using your machine quickly and easily. Detailed descriptions can be found in the following sections of this user manual.

Read the entire user manual carefully. Follow all safety instructions in order to ensure proper operation of your machine. The manufacturer accepts no liability if these instructions are not followed.

Multiple models of this machine series are described in this user manual. Please note that many functions are only available with specific models.

Symbols Used

Warns about dangers for people, damage to the machine or other objects as well as possible loss of data. Injuries or damage can result from improper handling.

This symbol designates tips that will help you to use your machine more effectively and easily.

User manual with installation guide (not depicted)

Depending upon model several cordless telephones are included.

⚡ If one of the parts is missing or damaged, please contact your retailer or our customer service.

Attaching the Paper Tray

Insert the paper tray into the openings behind the paper feed mechanism.

Inserting Paper

Before you can receive or copy documents, you must insert paper. Please use only suitable paper in the standard format **A4** (210 × 297 millimetre - preferably 80 g/m²). Observe the information in the technical data.

💡 Separate the paper sheets by fanning them out, then align them by tapping edge of the stack lightly against a flat surface. This will prevent several sheets of paper from being drawn in all at once.

- 1 Pull the lever on the right next to the paper feed mechanism forward.
- 2 Insert the paper into the paper feed mechanism. You can insert a **maximum of 50 pages** (A4 · 80 g/m²).
- 3 Push the lever on the right next to the paper feed mechanism back to lock the paper.

Connecting the Handset

Plug one end of the spiral cable into the socket on the telephone handset. Insert the other end into the socket designated with the ☞ symbol.

Connecting the Telephone Cord

Connect the telephone cord to the device by inserting it in the socket designated with **LINE**. Insert the telephone plug into your telephone connection socket.

 If you connect your device as extension to a telephone system, you must set it for working as an extension (also see Chapter "Telephone connections and additional devices, page 38).

Connecting the Power Cord

 Check whether the power type of your machine (indicated on the type plate) matches the power type available at the setup location.

Connecting power cord of the device

Insert the power cable into the connection located on the rear side of the machine. Connect the power cable to the electrical socket.

Connecting the power cord of the charging station

Connect the mains cable of the charging station to the electrical socket.

Initial Installation

After you have connected your machine to the power supply, the initial installation process begins. Hold **[1]** pressed (for at least two seconds). Your machine prints out a help page.

Selecting the Language

- 1 Use **▲/▼** to select the desired display language.
- 2 Confirm with **OK**.

Selecting the Country

 Always set the country in which you are operating the machine. Otherwise, your machine is not adapted to the telephone network. If your country is not included in the list, you must select a different setting and use the correct telephone cable for the country. Consult your retailer.

- 1 Use **▲/▼** to select the country in which you are operating the machine.
- 2 Confirm with **OK**.

After this input, the machine prints another help page and checks the telephone line.

Entering Your Number

Your number and name are printed in the top margin of every page (= header) together with the date, time and page number.

- 1 Enter your telephone number. You can enter a plus sign with **#** or *****.
- 2 Confirm with **OK**.

Entering Your Name

1 Enter your name. Letters are entered with the number buttons (see labels). Enter special characters with **0**. Press the respective button repeatedly until the desired letter or special character appears on the display.

 You can move the cursor with **▲/▼**. You can delete individual characters with **C**.

- 2 Confirm with **OK**.

After the input, the machine prints an overview of the functions.

Entering the Time and Date

- 1 Enter the time, for example **1 4 0 0** for 2 o'clock p.m.
- 2 Enter the date (two digits for each field), for example **0 8 0 6 0 7** for July 8th, 2007.
- 3 Confirm with **OK**.

 You can restart the initial installation process any time. Press **[1]** and **[2]**.

Inserting batteries in cordless telephone

- 1 Insert the new batteries in the battery compartment with the positive and negative poles as shown in the picture in the battery compartment.

 **Never** use non-rechargeable batteries in the cordless telephone. Follow the specifications in the technical data.

- 2 Place the cover on the battery compartment and slide it upward until it snaps into place.
- 3 Place the cordless telephone into the charging station.

 **Never** place the cordless telephone into the charging station without batteries.

 Leave the cordless telephone in the charging station for at least twelve hours. The batteries will heat up slightly during charging; this is not dangerous.

Putting cordless telephone in operation

Press the green  button for at least two seconds for switching on your cordless telephone.

Normally your cordless telephone is registered with your device in the factory. In the starting mode, press **OK**. The display shows on which base unit and with which number the cordless telephone is registered.

 If you acquired a model with several cordless telephones, only one cordless telephone is registered with your device in the factory. Insert the batteries as described above and register the cordless telephones with your device (also see Chapter "Telephone connections and additional devices", page 38).

Overview

Overview of the Menu Functions

The following functions are available on your device. There are two ways in which you can call functions:

Navigating in the menu: Press **OK** or one of the two arrow keys **▲/▼** to open the function menu. Page through **▲/▼** menu entries. Use **OK** to select a function. Press **C** to return to the previous menu level. Press **STOP** to close the menu and return to the starting mode.

General Safety Information

Your machine has been tested in conformity with standards EN 60950-1 and IEC 60950-1 and should only be operated with telephone networks and power systems that meet these standards. The machine was built exclusively for use in the indicated sales region.

Do not make any changes or settings that are not described in this user manual.

Setting Up the Machine

The machine should rest securely on a stable, flat surface. If the machine should fall, it can be damaged or cause injury to people, especially small children. The distance between the machine and other devices or objects must be at least 15 centimetres; this also applies to the use of additional cordless telephones. Do not place the machine in the vicinity of radios or televisions. Position all cables in such a way that no one will stumble on them, thus avoiding possible injuries to persons or damage to the machine itself.

Lock the cover of the machine completely into place when opening the machine. You could be injured if the cover falls while you are working on the machine.

Protect the machine against direct sunlight, heat, large temperature fluctuations and moisture. Do not place the machine in the vicinity of heaters or air conditioners. Observe the information on temperature and humidity in the technical data.

The machine must have sufficient ventilation and may not be covered. Do not put your machine in closed cabinets or boxes. Do not place the machine on soft surfaces such as tablecloths or carpets and do not cover the ventilation slits. Otherwise, the machine can overheat and catch on fire.

In the event that the machine becomes too hot, or if you see smoke coming from the device, you must immediately pull the power cable out of the power socket. Have your machine examined by trained professionals at a technical service location. To prevent the spread of fire, open flames should be kept away from the machine.

Do not plug in the machine in moist rooms. Never touch the power plug, power connection or the telephone socket with wet hands.

Do not allow liquids to enter into the machine. Disconnect the machine from the power socket if liquids or foreign objects have entered the machine and have your machine examined by trained professionals at a technical service location.

Do not allow children to handle the machine without supervision. The packing materials should be kept out of the hands of children.

Power Supply

Check whether the power type of your machine (indicated on the type plate) matches the power type available at the setup location. Use only the power and telephone cables supplied.

Set up your machine so that the power socket is easily accessible. The machine does not have an on/off button. In an emergency, disconnect your machine from the power supply by pulling the power plug.

Never touch the power or telephone cable if the insulation is damaged.

Disconnect your machine from the power and telephone networks during an electrical storm. If this is not possible, do not use the machine during an electrical storm.

Before cleaning the surface of your machine, disconnect it from the power and telephone networks. Never use liquid, gaseous or easily flammable cleansers (sprays, abrasives, polishes, alcohol).

Only clean the display with a dry, soft cloth. If the display breaks, a mildly corrosive liquid may escape. Avoid all contact with your skin and eyes.

In the event of a power failure, your machine will not function; saved data is retained.

Repairs

Should disruptions occur, follow the instructions on the display and on the error report.

Do not make any repairs to the machine yourself. Improper maintenance can result in injuries or damage to the machine. Only have your device repaired by an authorised service centre.

Do not remove the type plate from your machine; this would void the warranty.

Consumable Materials

Use only original consumable materials. These are available from a specialised retailer or through our order service. Other consumable materials could damage the machine or shorten its service life.

Dispose of old consumable materials according to the waste regulations of your country.

Cordless Telephone

Never place the cordless telephone in the charging station without rechargeable batteries or with non-rechargeable batteries.

Do not install or use your cordless telephone in a damp environment. Never touch the cordless telephone with wet hands.

The functioning of security systems, medical equipment or sensitive devices can be disrupted by the transmission power of the cordless telephone. Observe any usage regulations (or restrictions) in the vicinity of such equipment.

The batteries used must be disposed of according to the recycling regulations of your country.

I Telephone functions

For information on how to connect additional cordless telephones and another device and which functions are available to you, please refer the chapter on Telephone Connections and additional devices, Page 38.

Making Telephone Calls on the Machine

Dial the desired telephone number. There are multiple ways to do this. Then lift up the handset.

 You can also lift up the receiver first, then dial a number. The dialling process starts immediately.

Manual dialling: Dial the desired telephone number with the number pad.

Telephone book:

- 1 Press **OK** A-Z

 You can also load telephone book entries by pressing **OK**, **1** and **OK**.

- 2 Use **▲/▼** to select an entry. Enter the initial letters with the number buttons to navigate more quickly in the telephone book.

 You can save an entry multiple times with the same name but in a different category. In the telephone book, the first letter of the category appears after the entry.

Speed dialling: Press the desired speed dial button (1 ... 6).

Redial list: Press **OK**. Use **▲/▼** to select an entry from the list of dialled numbers.

 You can also load the redial list by pressing **OK**, **2** and **OK**.

Caller list: Hold **OK** pressed (for at least two seconds). Use the **▲/▼** to select an entry from the list of callers.

 You can also load the caller list by pressing **OK**, **2** and **OK**.

 For this function to work, the caller line identification (CLIP) must be activated for your telephone connection (country and network dependent). The number and name will not be shown if the caller suppresses his number.

Chain Dialling

You can combine and edit manually entered digits and saved entries, before the dialling process starts. If you have saved, for example, the telephone number prefix of an inexpensive telephone service provider (call-by-call) as a telephone book entry, select this entry and manually enter the subsequent telephone number or select another saved entry.

Inserting a Dialling Pause

It can be necessary to insert a dialling pause into the telephone number, for instance for the outside line access code, for an extension or sub-address or in a long distance number. Press **R**. The second part of the number is only dialled once the connection with the main number has been established.

Putting a call from cordless telephone

Dial the desired number. There are several ways to do this: Then press **OK**.

 You can also press **OK** first and then dial a number. The dialling process begins immediately.

Manual dialling: Dial the desired number using the numeric keypad.

Telephone book of the cordless telephone:

- 1 Long press **OK** (at least two seconds).
- 2 Select an entry using **▲/▼**. Enter the starting letters with the numeric keypad to quickly navigate through the telephone book.

 If you have added an additional number to an entry, this entry appears twice in the telephone book. The symbol of the category appears before the name.

Telephone book of the device

- 1 Press **OK**.
- 2 Select an entry using **▲/▼**. Enter the starting letters with the numeric keypad to quickly navigate through the telephone book.

Redial list Press and hold **OK** (at least two seconds). Using **▲/▼** dial an entry from the list of the dialled numbers.

Caller List:

- 1 Press **▲/▼**, and using **▲/▼** select CALLS.
- 2 Confirm with **OK**.
- 3 Using **▲/▼**, select from which list you would like to dial a number.
- 4 Confirm with **OK**.
- 5 Select the desired number using **▲/▼**.

 You can adjust the volume level of the speaker on the cordless telephone using **▲/▼** even during a call.

Looking up numbers

During a call, you can look up the telephone book entries.

- 1 During a call, press **OK** Menu.
- 2 Dial using **▲/▼** PHONEBOOK.
- 3 Using **▲/▼**, dial the desired entry.

 Press **OK** Return to go back to the previous menu level.

Other telephone calls

(Function is not supported in all countries and networks)

During a call, you can be informed about another call by a notification tone (= call waiting). Contact your telephone company to inquire about whether or not this additional function is available for your line.

 For this function to work, the caller line identification (CLIP) must be activated for your telephone connection (country and network dependent). The number and name will not be shown if the caller suppresses his number.

On the device

Press **R**, to toggle between the calls.

On the cordless telephone

Receiving a second call

During a call, press **●●ACCEPT** to accept the new call.

Switching between calls (= hold)

During the playback, press **[0]** to delete the current message.

Deleting messages already played

 Messages not yet heard must be heard first before deleting them.

- 1 Press **▲/▼**, and using **▲/▼** select **VOICE MAIL**.
- 2 Confirm using **OK**.
- 3 Using **▲/▼** select **MESSAGES**.
- 4 Confirm with **OK**.
- 5 Using **▲/▼** select **DELETE OLD**.
- 6 Confirm with **OK**.
- 7 Confirm the deletion with **●● Yes**. Using **● No** you can cancel the function.

Setting up forwarding and remote access

 These functions are available only on the device.

Entering the Access Code

In order that you can receive forwarded messages as well as check or control the answering machine from other telephones, you must enter an access code.

 The access code may not be identical to the VIP code.

- 1 Press **[2-9]**.
- 2 Use **▲/▼** to select **ACCESS CODE**.
- 3 Confirm with **OK**.

 You can also load the function by pressing **OK**, **[7]** **[9]** and **OK**.

- 4 Enter a four-digit code.
- 5 Confirm with **OK**.

Forwarding Messages

The machine forwards messages to a specified telephone number. Once the configured number of messages is

reached, the machine calls the number. If the call is answered, a greeting text is played. Then the person on the line must enter the access code. If no code is entered or an incorrect code is entered three times, the machine hangs up.

- 1 Press **[2-9]**.
- 2 Use **▲/▼** to select **FORWARDING**.
- 3 Confirm with **OK**.

 You can also load the function by pressing **OK**, **[7]** **[7]** and **OK**.

- 4 Use **▲/▼** to select whether you would like to switch forwarding on or off.
- 5 Confirm with **OK**.
- 6 Enter the number to which the received messages should be forwarded.
- 7 Confirm with **OK**.
- 8 Use **▲/▼** to select how many messages should be collected and forwarded together.
- 9 Confirm with **OK**.

 When you record a message, you are asked, if you would like to use the old message or would like to record a new one. Confirm using **OK**.

10 Recording a new greeting text: Press **OK** to record the greeting text. Wait until hearing the confirmation tone before starting the text.

11 Press **OK** to end the recording. The recording is played back.

Using the Remote Control

With a telephone call, you can listen to and delete messages, record a new outgoing message or switch the answering machine on or off.

 The telephone on this connection must be set to tone dialling. Press a button within 50 seconds, otherwise the connection is cut-off (country and network dependent).

- 1 Call your telephone number.
- 2 Wait until the answering machine switches on and plays back the outgoing message.
- 3 Enter the access code.
- 4 The machine interrupts the outgoing message and plays new messages. If no new messages have been received, you will hear two confirmation tones.

 If you select the **5/2** option for the number of rings of the answering machine, the answering machine switches on after two rings, when you have received new messages. If there are no new messages, the device rings five times. If the device does not pick up after two rings, you have no new messages. You can terminate the remote access without incurring any telephone costs.

- 5 The functions below are available via the number buttons.
- 6 Hang up to end the remote control session.

3 Confirm with **OK**.

 You can also load the function by pressing **OK**, **7** **4** and **OK**.

4 Use **▲/▼** to select the desired recording length or unlimited time (automatic).

5 Confirm with **OK**.

6 Fax

Press **I** and **4** to print the instructions for sending faxes and for fax switch settings.

Do not insert any documents into the machine that ...

... are wet, have been edited with correction fluid, are soiled or have a coated surface.

... are written on with a soft pencil, with paint, chalk or charcoal.

... originate from newspapers or magazines (printing ink).

... are held together with office or notebook staples or with tape or glue.

... are pasted with note papers.

... are creased, crumpled or torn.

Use documents with sizes **A5** or **A4** with 60 to 100 g/m² weight. You can insert **up to 10 documents** at a time.

Press **STOP** to eject the documents without sending them.

Sending fax

1 Insert the documents face down into the document feeder. The top most document will be fed in first.

2 Then configure the desired resolution. You can choose between **RESOL. : STANDARD** (for documents without special features), **RESOL. : FINE** (for texts with small print or drawings) and **RESOL. : PHOTO** (for photos). Press **I**. The configured resolution appears on the display. Press **I** again to change the resolution.

You can adjust the default contrast (see also section Settings, page 33).

3 Dial the desired telephone number. There are multiple ways to do this.

4 Press **START**.

If the subscriber is busy, the machine dials again after a certain period of time. Press **STOP** to interrupt the transmission process. After the transmission, the machine prints out a transmission report, depending on the settings.

Manual dialling: Dial the desired telephone number with the number pad.

Telephone book:

1 Press **I** **A-Z**

You can also load telephone book entries by pressing **OK**, **1** **1** and **OK**.

2 Use **▲/▼** to select an entry. Enter the initial letters with the number buttons to navigate more quickly in the telephone book.

You can save an entry multiple times with the same name but in a different category. In the telephone book, the first letter of the category appears after the entry.

Speed dialling: Press the desired speed dial button (1 ... 6).

Redial list: Press **OK**. Use **▲/▼** to select an entry from the list of dialled numbers.

You can also load the redial list by pressing **OK**, **2** **2** and **OK**.

Caller list: Hold **OK** pressed (for at least two seconds). Use the **▲/▼** to select an entry from the list of callers.

You can also load the caller list by pressing **OK**, **2** **1** and **OK**.

For this function to work, the caller line identification (CLIP) must be activated for your telephone connection (country and network dependent). The number and name will not be shown if the caller suppresses his number.

Manually Sending a Fax

1 Insert the document.

2 Press **I**.

3 Enter the desired telephone number with the number pad or select a saved entry.

4 Press **START**.

Broadcasting

You can send one fax to multiple recipients in succession.

Entering Recipients Individually

1 Insert the document.

2 Press **OK**, **3** **4** and **OK**. The document is scanned.

3 Enter the desired telephone number with the number pad or select a saved entry.

4 Confirm with **OK**.

5 Enter the additional telephone numbers.

6 Confirm with **OK**. You can enter up to 25 recipients.

7 Press **START**. The machine sends the fax message to all recipients in succession.

Sending a Fax to a Group

- 1 Insert the document.

- 3 Use **▲/▼** to select the group to which you would like to send a fax.
- 4 Confirm with **OK**.
- 5 Use **▲/▼** to select **SEND FAX?**.
- 6 Confirm with **OK**.

 If your machine cannot reach a recipient, the fax message is sent to the other recipients. After the machine has called all recipients, it once again dials the numbers that previously could not be reached.

Delayed Fax Transmission

If you would like to make use of the lower telephone tariffs or if the recipient can be reached at some specific time only, you can send the fax at a later time – within 24 hours.

- 1 Insert the document.
- 2 Press **OK**, **③③** and **OK**.
- 3 Enter the time, at which the document should be transmitted, e.g. **①④ ⑩⑩** for 2 pm.
- 4 Confirm using **OK**.
- 5 Enter the desired telephone number with the number pad or select a saved entry.
- 6 **Selecting a saved entry:** Confirm the selected entry using **OK**.
- 7 Press **START**. The device goes into standby mode and transmits the fax at the entered time. You can continue to place calls and receive faxes.

Press **STOP** to eject the document. This interrupts the standby mode.

Receiving Faxes

If you have not changed the factory settings, received faxes will be printed out immediately. If no paper or no ink film is inserted, the machine saves the incoming faxes. The  button blinks. Once paper or a new ink film is inserted, the saved faxes are printed out.

 Check whether you have inserted and clamped in the paper correctly. The lever on the right next to the paper feed mechanism must be pushed back.

If the message memory is full, no additional messages can be received. A warning appears on the display. Observe the information in the technical data.

 If there are problems with printing out saved fax messages, a service code is available (see also section Service, page 45).

Polling Faxes

With the fax polling function, you can retrieve faxes that lie ready in the dialled fax machine. You can also provide documents on your machine to be polled by others.

Polling Faxes Directly

- 1 Enter the desired telephone number with the number pad or select a saved entry.

 If you would like to poll fax messages from an extension number or a sub-address, add this after the telephone number. After entry, press the number **R** then enter the extension number or sub-address. The second part of the number is only dialled once the connection with the main number has been established.

- 2 Hold **START** pressed (for at least two seconds).

Polling Secure Faxes

With this function, you can poll faxes that are protected with a code.

- 1 Press **OK**, **③①** and **OK**.
- 2 Enter the code.
- 3 Confirm with **OK**.
- 4 Enter the desired telephone number with the number pad or select a saved entry.
- 5 Press **START**.

Sending Faxes via Polling

 Protect your document against unauthorised access with a code.

A caller who knows the code can poll the fax from your machine. You can continue to make telephone calls and receive faxes.

- 1 Insert the document.
- 2 Press **OK**, **③②** and **OK**.
- 3 Enter a code (max. 20 characters).
- 4 Confirm with **OK**.

Press **STOP** to eject the document. This interrupts the standby mode.

Using Fax Templates

Five fax templates, which you can use, are stored in your device. With these templates you can quickly create, for example, a short fax note or an invitation.

- 1 Press **OK**, **④③** and **OK**.
- 2 Using **▲/▼** select the template you would like to print.
- 3 Confirm using **OK**. The device prints the template.
- 4 Fill the template and send it to the desired recipient per fax.

7 Copier

 Press **1** and **5** to print help for copying.

Use documents with sizes **A5** or **A4** with 60 to 100 g/m² weight. You can insert **up to 10 documents** at a time.

Inserting Documents

- 1 Insert the documents face down into the document feeder. The top most document will be fed in first.

- 2 Then configure the desired resolution. You can choose between **RESOL. : STANDARD** (for documents without special features), **RESOL. : FINE** (for texts with small print or drawings) and **RESOL. : PHOTO** (for photos). Press **RESOL.**. The configured resolution appears on the display. Press **RESOL.** again to change the resolution.

 You can adjust the default contrast (see also section Settings, page 33).

 Press **[I]** and **[D]** to print the instructions for SMS functions.

SMS Requirements

Your device is preset for using the SMS (Short Messaging Service) services. Caller identification (CLIP) must be activated for the SMS to work. It is possible that you will not be able to send and receive SMS messages from a private branch exchange (depending on the country and network).

 Should you face problems in sending SMS, the reason for the same could be that you are using a secret number or that the device is connected to an old ISDN System.

 Ask your telephone service provider ...

- ... whether you must register for the SMS Service.
- ... to which mobile telephone service providers you can send SMS
- ... which costs are applicable.
- ... which functions are available.

- 3 Confirm with **OK**.

Selecting the Country

 Always set the country in which you are operating the machine. Otherwise, your machine is not adapted to the telephone network. If your country is not included in the list, you must select a different setting and use the correct telephone cable for the country. Consult your retailer.

 When you select a new country, all settings are reset to the factory defaults for that country. Saved data is retained. Check the number entered for the header.

- 1 Press **OK**, **⑨③** and **OK**.
- 2 Use **▲/▼** to select the country in which you are operating the machine.
- 3 Confirm with **OK**.
- 4 Use **▲/▼** to select **SURE: YES**.
- 5 Confirm with **OK**.

Entering Your Number

Your number and name are printed in the top margin of every page (= header) together with the date, time and page number.

- 1 Press **OK**, **⑨④** and **OK**.
- 2 Enter your telephone number. You can enter a plus sign with **Ⓢ** or **Ⓣ**.
- 3 Confirm with **OK**.

Entering Your Name

- 1 Press **OK**, **⑨⑤** and **OK**.
- 2 Enter your name. You can enter characters using the numeric keys (see button labels) Enter special characters using **⑩**. Press the respective key several times until the desired character or special character appears on the display.
- 3 Confirm using **OK**.

Setting the Contrast

Various contrast levels are available to you for copying and printing of faxes.

- 1 Press **OK**, **④④** and **OK**.
- 2 Use **▲/▼** to select the desired contrast:
CONTR. : LIGHT—For lighter printing
CONTR. : NEUTRAL—For all types of documents (including white text on a black background)
CONTR. : OPTIMISED (factory default)—Optimised adjustment for text and photo printing
CONTR. : DARK—For darker printing
- 3 Confirm with **OK**.

Lowering the Transmission Speed

The machine adapts the transmission speed to the line quality. This may take some time, especially for overseas connections. Set a lower transmission speed if you are sending faxes into networks with poor line quality.

- 1 Press **OK**, **③⑧** and **OK**.
- 2 Use **▲/▼** to set whether you would like to use a lower transmission speed.
- 3 Confirm with **OK**.

Switching Page Adjustment On and Off

In order that no information is lost, received faxes are reduced in size when printed.

- 1 Press **OK**, **③⑦** and **OK**.
- 2 Use **▲/▼** to select whether you would like to switch size reduction on or off.
- 3 Confirm with **OK**.

Setting Ring Tones

Selecting the Ring Tone

You can select from among ten different ring tones.

- 1 Press **OK**, **⑤⑤** and **OK**.
- 2 Use the number buttons **①** to **⑩** to select a ring tone. Use **▲/▼** to adjust the volume.
- 3 Confirm with **OK**.

Setting the Volume

You can adjust the volume of the ring tone when the device is ringing or when you set the ring tone. You can save different volumes for the * (day) and ☒ (night) modes, (also see Chapter Fax Switch).

Using ▲/▼ you can set adjust the volume when the device is ringing.

Configuring the Fax Switch

The built-in fax switch of your machine distinguishes between fax messages and telephone calls. Faxes are automatically received, telephone calls can be received—even on additionally connected devices. While the machine is checking the call, it continues to ring.

You can set how often the machine should ring before picking up separately for the modes * (day) and ☒ (night). This makes it possible to receive faxes silently at night, so as not to disturb you.

Press ☎/☒/☒ to switch between day and night mode. With the activated timer ⓪, the machine switches between the modes * (day) and ☒ (night) at the configured times.

Configuring Day Mode

- 1 Press **OK**, ⑤① and **OK**.
- 2 Using ▲/▼ select the number of rings for the answering machine. The answering machine responds after these many number of rings.
- 3 Confirm using **OK**.
- 4 Using ▲/▼ select the number of rings for the fax switch. After these many rings, the fax switch switches on and distinguishes between fax transmissions and telephone calls. While the device is checking the call, it continues to ring.
- 5 Confirm using **OK**.
- 6 Using ▲/▼, set the volume.
- 7 Confirm using **OK**.

 If you select the 5/2 option for the number of rings of the answering machine, the answering machine switches on after two rings, when you have received new messages. If there are no new messages, the device rings five times. If the device does not pick up after two rings, you have no new messages. You can terminate the remote access without incurring any telephone costs.

Configuring Night Mode

- 1 Press **OK**, ⑤② and **OK**.
- 2 Configure the same settings as for the day mode (see steps 2 to 7).

Setting the Timer

The timer switches between the modes * (day) and ☒ (night) at the configured times.

- 1 Press **OK**, ⑤③ and **OK**.
- 2 Enter the time at which the machine should switch to * (day) mode, for example ⑥⑥ ⑥⑥ for 6 o'clock a.m.

- 3 Confirm with **OK**.
- 4 Enter the time at which the machine should switch to ☒ (night) mode, for example ②② ①① for 10 o'clock p.m.
- 5 Confirm with **OK**.

Special Settings

Silent Fax Reception

If you would like to accept a fax without preceding rings, set the number of rings of the fax switch to 0.

Switching Off All Rings

If you don't want to be disturbed, e.g. in the night, by any incoming calls, you can set the number of rings to 0. The device switches immediately to silent fax reception.

Manually Receiving Faxes

Select manual reception under number of rings of the fax switch. The device will not receive faxes on its own. You can start fax reception manually, by pressing **START**. This setting is useful, when you want to receive faxes via a modem connected to a computer.

12 Telephone Lines and Additional Devices

Configuring Telephone Lines and Services

Private Branch Exchanges

Private branch exchanges (PABX) are typical in many offices and private households. You must dial an outside line access code in order to establish a connection with the public telephone network (PSTN) from an extension.

 An additional telephone connected to the machine on a telephone socket is not considered an extension.

- 1 Press **OK**, **Ⓢ** **Ⓢ** and **OK**.
- 2 In many countries, you can set either pulse dialling or tone dialling (DTMF tones). Use **▲/▼** to select the desired dialling method.
 Only use pulse dialling if tone dialling is not yet activated for your telephone line.
- 3 Confirm with **OK**.
- 4 Use **▲/▼** to set whether you operate your machine on an extension.
- 5 Confirm with **OK**.
- 6 **Configuring an extension:** Enter the outside line access code with which you reach the public telephone network. This is usually **Ⓢ**.
- 7 When finished, the machine tests the telephone line. Confirm with **OK**.
- 8 Your machine checks whether it can establish a connection with the public telephone network. If it cannot establish the connection, you are once again asked for input.

 In rare cases, the outside line access code may be a different number or a two-digit number. For older telephone systems, the outside line access code can be **R** (= Flash). Press **R** to enter this outside line access code. Should a connection to the public telephone network not be possible, contact the provider of your telephone system.

DSL Connection

In the event that you use a DSL modem: Connect the machine after the modem. For additional information, please consult the operating manual of your DSL system.

ISDN Connection

Details for ISDN connections can be found in the instructions provided with the terminal adapter or the dial-up router.

Voice Mailbox

You cannot simultaneously use the answering machine facility of your telephone service provider (= voice-mail box) and receive faxes on your devices. Get the mail-box function for your telephone connection deactivated or set the number of rings for the fax switch to lower than **5** on your device (also see Chapter Setting the Fax Switch, Page 34). When the fax switch accepts the call, the mail-box of the service provider does not step in. Enquire with your telephone company.

Registering and de-registering additional cordless telephones

Normally your cordless telephone is registered with your device in the factory. In the starting mode, press **OK**. The display shows on which base unit and with which number the cordless telephone is registered.

 If you acquired a model with several cordless telephones, only one cordless telephone is registered with your device in the factory. Insert the batteries as described above and register the cordless telephones with your device (also see Chapter "Telephone connections and additional devices", page 38).

You can register in all up to six cordless telephones with your device. Using only original cordless phones as additional cordless phones ensures optimum use of all functions. You can get original cordless telephones through our order service or at specialist shops.

 Additional cordless telephone must be GAP-compatible.

Registering cordless telephone

You must first bring the cordless telephone and then your device (= base station) in the registration mode to register a cordless telephone.

- 1 Press **▲/▼**, and using **▲/▼** select **SETTINGS**.
- 2 Confirm using **OK**.
- 3 Dial using **▲/▼** **ADVANCED SET.**
- 4 Confirm using **OK**.
- 5 Dial using **▲/▼** **SET HANDSET**.
- 6 Confirm using **OK**.
- 7 Dial using **▲/▼** **REGISTRATION**.
- 8 Confirm using **OK**.
- 9 Confirm using **●● Yes**. The cordless telephone goes into registration mode.
- 10 Press **OK**, **Ⓢ** **Ⓢ** and **OK** on the device
- 11 Confirm the preset PIN code (**0000**) using **OK**.

The cordless telephone is automatically registered. This process can take a few minutes. Then the number with which it is registered with the device appears on the display of the cordless telephone.

 You can register other cordless telephones with your device in the same manner. If you face any difficulties in registering, de-register all cordless telephones, and re-register them individually.

De-registering cordless telephone

On the device

- 1 Press **OK**, **8** **3** and **OK**.
- 2 Using **▲/▼** select which cordless telephone you are would like to de-register.
- 3 Confirm using **OK**. The device disconnects from the cordless telephone.

On the cordless telephone

- 1 Press **▲/▼**, and using **▲/▼** select **SETTINGS**.
- 2 Confirm using **OK**.
- 3 Dial using **▲/▼** **ADVANCED SET.**
- 4 Confirm using **OK**.
- 5 Dial using **▲/▼** **SET BASE**.
- 6 Confirm using **OK**.

- 8 Confirm using **OK**.
- 9 Using **▲/▼** select which cordless telephone you are would like to de-register.
- 10 Confirm using **OK**.
- 11 Confirm the de-registration with **●● Yes**. The connection with the device is disconnected.

Registering the cordless telephone with other devices

You can register a cordless telephone on four different devices (= base units).

On the device

- 1 Register the cordless telephone with the first device as described above.
- 2 Press **OK**, **8** **2** and **OK** on the next device.
- 3 Confirm the preset PIN code (**0000**) or enter a new PIN code.

 The pin code can be identical with the pin code on the first device.

- 4 Confirm using **OK**.

On the cordless telephone

- 5 Press **▲/▼**, and using **▲/▼** select **SETTINGS**.
- 6 Confirm using **OK**.
- 7 Dial using **▲/▼** **ADVANCED SET.**
- 8 Confirm using **OK**.
- 9 Dial using **▲/▼** **SET HANDSET**.
- 10 Confirm using **OK**.
- 11 Dial using **▲/▼** **PERSON. REGISTR.**
- 12 Confirm using **OK**.
- 13 Select the next device (= base station) using **▲/▼**.
- 14 Confirm using **OK**.
- 15 Confirm the name of the base unit, or enter a new name.
- 16 Confirm using **OK**.

- 17 Enter the same pin code which you entered on the other device.

- 18 Confirm using **OK**.

- 19 Using **▲/▼** select the number with which you would like to register the cordless telephone on the device.

- 20 Confirm using **OK**.

Setting the preferred base unit

With this function you can specify which device (= base station) should be used for placing telephone calls if you have registered your cordless telephone with multiple devices. When you select **AUTO**, the cordless telephone automatically connects to the device that is within the range.

- 1 Press **▲/▼**, and using **▲/▼** select **SETTINGS**.

- 2 Confirm using **OK**.

- 3 Dial using **▲/▼** **ADVANCED SET.**

- 4 Confirm using **OK**.

- 5 Dial using **▲/▼** **SET HANDSET**.

- 6 Confirm using **OK**.

- 7 Dial using **▲/▼** **BASE PRIORITY**.

- 8 Confirm using **OK**.

- 9 Press **●** **EDIT ENTRY**.

- 10 Using **▲/▼** select the device to which you would like to assign the priority, or select auto setting.

- 11 Confirm using **OK**.

Connecting Additional Devices

You can operate other devices on a telephone line, for instance answering machines, modems or charge counters

Connection to the device

You can connect additional devices directly to your machine. Plug the telephone cable of the additional device into the **EXT** socket (RJ-11 connection) of your machine.

 We recommend direct connection to the machine because this allows the fax switch to function optimally and to control the additional devices.

Connection to the Telephone Line

In order for the fax switch to function, the machine must be first in the series if multiple devices are connected to the same telephone socket. Follow the correct order.

Using Additional Telephones (Easylink)

With the Easylink function, you can control your machine with additional telephones. To use this function, additional telephones must be set to tone dialling (DTMF tones); see here the user manual of your additional telephone.

Starting Fax Reception

If you pick up on an additional device and hear that you are receiving a fax message (whistle or silence), you can start the fax reception by pressing ***5** on the additional telephone or the **START** button on the machine.

Taking Over the Line

If you pick up on an additional telephone and the machine continues to ring or attempts to receive a fax, you can disconnect the machine from the line. Press ***#** on the additional telephone.

Changing Codes

 Only change the codes if it is absolutely necessary. The codes must begin with ***#** or **#** and must be different.

- 1** Press **OK**, **5** **4** and **OK**.
- 2** Enter the new code for starting fax reception.
- 3** Confirm with **OK**.
- 4** Enter the new code for taking over the line on an additional device.
- 5** Confirm with **OK**.

13 Service

 Should disruptions occur, follow the instructions on the display and on the error report.

Changing the ink film

 Use only original consumable materials. These are available from a specialised retailer or through our order service. Other consumable materials can cause damage to the machine.

 Follow the instructions on the packaging of the consumable materials.

For receiving or copying documents, an ink film must be inserted in your device. Your device is delivered with an already inserted free ink film for a few test pages. For this film, you do not require any plug'n'print card (= chip card with information regarding ink film capacity). For every next film that you insert, you must load the capacity memory with the included plug'n'play card.

- 1 Remove the paper from the paper feeder and take the paper tray out of the device.
- 2 Open the device by lifting the panel using grip in the centre and folding it down.

 Lock the cover of the machine completely into place when opening the machine. You could be injured if the cover falls while you are working on the machine.

- 3 Grip the rear ink film roll at both the sides and place it next to the front ink film roll.

- 4 Remove both the rolls from the device. The used ink film cannot be reused.

 The messages and copies you have printed out can be read from used ink films. Consider data protection issues when disposing of used ink films.

- 5 Pull the used plug'n'print card out of the plug socket on the left hand side next to the ink film tray. The plug'n'print card cannot be reused.

- 6 Carefully remove the rubber bands from the new ink film. Make sure that the film is not damaged!

- 7 Place the larger roll with the ink film in the rear ink film tray. The blue gear wheel must be on the right hand side.

- 8 Place the smaller roll without film in the front tray. The blue gear wheel must be on the right hand side and the pin must be inserted in the depression on the left hand side.

- 9 Break the chip card from the plug'n'print card. Insert the chip card in the plug socket on the left hand side next to the ink film tray.

- 10 Turn the blue gear wheel forward to tension the ink film. The ink film must not have any creases.

- 11 Close the device. Insert the paper tray in the opening provided for it behind the paper feeder. Insert paper again.

Checking the Ink Film Reserve

- 1 Press **OK**, **4** and **OK**.
- 2 The number of pages that can still be printed with the ink film is shown on the display.
- 3 Press **STOP** to return to the starting mode.

If the ink film used up or if there is no ink film in the machine, a message appears on the display.

Changing the batteries in the cordless telephone

- 1 Press and hold  (at least two seconds) for switching off the cordless telephone.
- 2 Open the battery compartment on the backside of the cordless telephone by pulling the cover down.

- 3 Remove the old batteries.

 The batteries used should be disposed of according to the recycling regulations of your country.

- 4 Insert the new batteries in the battery compartment with the positive and negative poles as shown in the picture in the battery compartment.

 **Never** use non-rechargeable batteries in the cordless telephone. Follow the specifications in the technical data.

- 5 Place the cover on the battery compartment and slide it upward until it snaps into place.
- 6 Place the cordless telephone into the charging station.

 Never place the cordless telephone into the charging station without batteries.

 Leave the cordless telephone in the charging station for at least twelve hours. The batteries will heat up slightly during charging; this is not dangerous.

Displaying the battery charge

The charge indicator on the display shows the charge level of the battery. If the charge is too low, the display illumination is switched off and the hands-free function is not available. Place the cordless telephone into the charging station.

Fixing a Paper Jam

- 1 Remove the paper from the paper feeder and take the paper tray out of the device.
- 2 Open the device by lifting the panel using grip in the centre and folding it down.

- ⚠** Lock the cover of the machine completely into place when opening the machine. You could be injured if the cover falls while you are working on the machine.

- 3 Carefully pull the paper out.

- 4 Turn the blue gear wheel forward to tension the ink film. The ink film must not have any creases.

- 5 Close the device. Insert the paper tray in the opening provided for it behind the paper feeder. Insert paper again.

Fixing a Document Jam

- 1 Remove the paper from the paper feeder and take the paper tray out of the device.
- 2 Open the device by lifting the panel using grip in the centre and folding it down.

- ⚠** Lock the cover of the machine completely into place when opening the machine. You could be injured if the cover falls while you are working on the machine.

- 3 Open the scanner cover and the cover of the automatic document cover by first pushing the support (A) and then the support (B) inside. The cover (C) folds below.

- 4 Carefully pull the document to the front or to the back out of the device.

- 5 Close the scanner cover and the cover of the automatic document feeder. Both the supports must securely snap into place.

- 6 Turn the blue gear wheel forward to tension the ink film. The ink film must not have any creases.

- 7 Close the device. Insert the paper tray in the opening provided for it behind the paper feeder. Insert paper again.

Cleaning

⚠ Unplug the machine from the power socket before cleaning it. Use a soft, lint-free cloth. Never use liquid or easily flammable cleansers (sprays, abrasives, polishes, alcohol, etc.). Do not allow any moisture to reach the interior of the machine.

💡 Special fax cleaning sheets are available as accessories from our call centre. Insert a sheet into the document feeder. Press **STOP**; the page is ejected. Repeat this process at a few times.

- 1 Remove the paper from the paper feeder and take the paper tray out of the device.
- 2 Open the device by lifting the panel using grip in the centre and folding it down.

⚠ Lock the cover of the machine completely into place when opening the machine. You could be injured if the cover falls while you are working on the machine.

- 3 Open the scanner cover and the cover of the automatic document cover by first pushing the support (A) and then the support (B) inside. The cover (C) folds below.

- 4 Lightly wipe the upper side of the scanner glass (A) and the lower side of the document feeder/scanner film (= white plastic plate) (B) with a cloth.

- 5 Clean the feed roller (A) and the underside of the support pad of the feeder roller (B) with a soft, lint-free cloth moistened with cleaning alcohol (96 percent). Rotate the feed roller; You must clean the entire roller.

- 6 Close the scanner cover and the cover of the automatic document feeder. Both the supports must securely snap into place.

- 7 Turn the blue gear wheel forward to tension the ink film. The ink film must not have any creases.

- 8 Close the device. Insert the paper tray in the opening provided for it behind the paper feeder. Insert paper again.

Using Service Codes

The service codes delete all the changed settings and your device is reset to factory settings. It may be possible that the device with the changed settings reacts differently than expected.

⚠ Only use the service code if this is absolutely necessary. Many service codes also delete saved messages and telephone book entries.

- 1 Press **OK**, **④⑤** and **OK**.

- 2 Enter a service code:

⑦①①⑦—Deletes all changed settings and saved data. The device is reset to factory settings and the initial installation process is started.

⑦①④①—Deletes all changed settings. Saved data and telephone book entries remain intact.

⑦②②⑦—Deletes saved faxes, when there are problems with printing.

- 3 Confirm using **OK**.

- 4 Dial using **▲/▼ SURE: YES**.

- 5 Confirm using **OK**.

⚠ If you have entered the incorrect code, you can cancel the entry with **SURE: NO**.

Power Cycling

If a problem occurs that cannot be corrected with the instructions in this user manual (see also the help below), follow the steps given here.

- 1 Pull out the power plug.
- 2 Wait at least ten seconds, then plug the power plug back into the socket.
- 3 If the error occurs again, please contact our technical customer service or your retailer. Follow the instructions on the display and on the error report.

General information	
The time and date flash on the display.	You must check the time and date after a short power failure. Confirm using OK .
Problems when faxing or printing	
Faxes sent are of poor quality.	Change the resolution from RESOL.: STANDARD to RESOL.: FINE or RESOL.: PHOTO . Change the contrast. Clean the scanner and the document feed slot. Test the device by making a copy of the document. If the device is in order, the fax machine of the recipient is defective.
The device produces black lines when sending or printing.	Clean the scanner and the document feed slot.
Copy is blank.	Insert the documents face down into the document feeder.
Printing is interrupted.	Paper or document jam, no paper or ink film. Follow the instructions on the display and in the error report. There could be a small pause after printing several pages. The device continues printing automatically.
No printing	Check if you have inserted clamped paper correctly. The lever on the right hand side next to the paper feeder must be folded backwards.
Documents are not properly fed.	Clean the scanner and the document feed slot.

Problems with the connection	
The device rings once, remains silent for a short while and starts ringing again.	This is absolutely normal. The fax switch checks the call after the first ring. If it is a voice call, the device continues to ring.
No dial tone	Check the installation of the device. Connect the telephone cable to the socket marked LINE . Insert the telephone plug into your telephone connection socket.
Fax transmissions are constantly interrupted.	Try to send the fax manually: Press Ⓜ and dial the number. If the recipient is using an answering machine, wait until you hear a whistling tone. Press START . It is possible that the recipient's machine is not ready to receive.
You hear a whistling tone or silence in the handset.	The call is a fax: Press START on the device. In addition, press Ⓜ Ⓜ on the telephone. Hang up.
No fax reception	It is possible that the telephone service provider has activated the answering machine function (= voice mail-box) for your telephone connection. Deactivate the mail-box or set the number of rings for the fax switch to less than 5 on the device. Enquire with your telephone company.
Problems with the cordless telephone	
Display shows only the battery charge.	Check if the cordless telephone is functioning and is registered with the device. Switch the cordless telephone off. Open the battery compartment on the backside. Remove the batteries and insert them again. Close the battery compartment and switch the cordless telephone on again.
No dial tone	The cordless telephone is not registered with the device or is out of range.
The cordless telephone cannot be switched on.	Place the cordless telephone into the charging station.
The cordless telephone cannot be switched on after 12 seconds in the charging station.	Change the batteries in the cordless telephone (also see Chapter Service, Page 42).

Guarantee

(UK Terms and Conditions)

At the beginning of April 2002, SAGEM SA bought the PHILIPS fax business unit. SAGEM SA is now the European Number 1 in fax and offers a complete range of fax terminals with Internet access and SMS function, multi-functional terminals and servers covering the needs of all its customers—from home-users to multinational organisations.

In order to apply the guarantee, you should contact your dealer. Proof of purchase will be required. Should malfunctioning arise, the dealer will advise you what to do.

If you bought your equipment from SAGEM directly, the following shall apply:

A SAGEM undertakes to remedy by repair, free of charge for labour and replacement parts, any defects in the equipment during a period of twelve (12) months from the date of original delivery of the Equipment, where those defects are a result of faulty workmanship. During this twelve month guarantee period, the defective equipment will be repaired free of charge; the customer must however first contact the SAGEM After Sales Department, the phone number of which can be found on the delivery slip or in the user manual. Unless the customer has concluded with SAGEM a maintenance contract in respect of the equipment which specifically provides for repairs to be carried out at the customer's premises, the repairs will not be carried out on the equipment at the customer's premises. The following sentence applies to purchases of equipment for the customer's trade, business or profession. Except as otherwise expressly provided in this Document and to the extent permitted by law, SAGEM makes no representations or warranties, express or implied, statutory or otherwise, and to such extent, all terms and conditions implied by law are hereby excluded. This guarantee does not affect the Customer's statutory rights.

B Exclusions From Guarantee

SAGEM shall have no liability under the guarantee in respect of:

- damage, defects breakdown or malfunction due to:
 - failure to properly follow the installation process and instructions for use; or
 - an external cause to the equipment (including but not limited to, lightning, fire, shock or water damage of any nature); or
 - modifications made without the written approval of SAGEM SA; or
 - a failure or neglect to maintain the equipment or inappropriate maintenance; or
 - unsuitable operating conditions, particularly of temperature and humidity; or
 - repair or maintenance of the equipment by persons not authorised by SAGEM; or
- wear and tear from normal daily use of the equipment and its accessories
- damage due to insufficient or bad packaging of equipment when returned to SAGEM

- supply of new versions of software
- work on any equipment or software modified or added without the prior written consent of SAGEM
- malfunctions not resulting from the Equipment or from software installed in user workstations for the purpose of use of the equipment
- communication problems related to an unsuitable environment, including:
 - problems related to access and/or connection to the Internet such as interruptions by access networks or malfunction of the line used by the subscriber or his correspondent
 - transmission faults (for example poor geographical coverage by radio transmitters, interference or poor line quality)
 - the local network fault (wiring, servers, workstations) or the failure of the transmission network
- the normal servicing (as defined in the user guide supplied with the equipment) as well as malfunctioning due to servicing not being carried out, servicing costs are in any event always borne by the customer.

C In the cases set forth in § B as well as after expiry of the twelve month guarantee period, the customer must ask SAGEM for an estimate, and he/she must accept the estimate and agree to pay the charges mentioned in it before returning the equipment to SAGEM. The repair and delivery costs will be invoiced to the customer.

The foregoing shall apply unless otherwise agreed in writing with the customer and only for the UK. If any provision of this guarantee shall be held to be in whole or in part invalid or illegal due to an obligatory rule applicable to consumers pursuant to their national legislation, such invalidity or illegality shall not impair or affect the remaining provisions or parts of this guarantee.

The CE symbol confirms conformity with the EU directives that apply to the device.
